

Shreyansh Sharma

Full Stack Developer, India

- **Email:** code.shreyansh@gmail.com
 - **GitHub:** [shreyansh-github](#)
 - **Portfolio:** [my-world-3d.netlify.app/landing](#)
 - **Contact:** +91 7049766754
-

Skills

- **Frontend:** React.js, React Native, Xstate, Next.js, Redux, HTML5 Canvas, Three.js, React Three Fiber, GSAP, TailwindCSS, CSS/SCSS, UI Libraries.
 - **Backend:** Node.js, Express (REST), Firebase (Cloud Functions), GraphQL, Apollo Server, MongoDB, SQL, Webpack.
 - **Testing & Tools:** Jest (unit testing), Puppeteer, Git, Postman.
 - **Others:** SAAS, Redux Toolkit.
-

Education

Mechanical Engineering (Bachelor's) SIRT College, India (2015-2019)

- Relevant courses: Object-Oriented Programming.
 - **Project:**
 - **Smart Helmet:** Integrated electronic systems with helmets for bike operation and accident GPS surveillance.
-

Work Experience

Turing (Remote) — *LLM Trainer (Llama model)*

Mar 2025 – Ongoing

- Training the Llama model, for Meta.
- Developing 3D and 2D simulations for training the model and analyzing the model responses.
- Mastering [Three.js](#) and [P5.js](#) along with [matter.js](#) and [cannon.es](#) .
- Engaging in different simulations in the field of Botany, Mechanics and Ecology etc.

FPS Lounge (Remote, USA) — *Fullstack Engineer*

Mar 2024 – Jan 2025

- Product-based company focused on coaching for Esports.
 - Managed and enhanced an existing site, adding features, fixing bugs, and optimizing performance.
 - Migrated the codebase from React to Next.js framework.
 - Revamped the site with new designs, tools like Redux, and Tailwind CSS for improved UI and beta features.
 - Worked on Firebase Cloud Functions for backend tasks.
-

Protonshub (India) — *Software Engineer*

Aug 2020 – Jan 2024

- Curated a dashboard app for a Fortune 500 Pharmacy Benefit Manager using React.js.
 - Developed a talent management app, **Natty-Hatty**, for students and clubs using Next.js and Redux Toolkit.
 - Built and maintained native mobile apps.
 - Interacted with clients to solve queries related to apps.
 - Designed engaging UIs for web platforms, working with distributed teams.
 - Created **Gully Mart**, a marketplace for groceries, using GraphQL, Apollo Server, and Next.js.
 - Developed a marketing site for Gully Mart.
 - Built a food delivery prototype App for Protonshub.
-

Raincode (Remote, India) — *Fullstack Engineer*

2019

- Developed and maintained PWAs.
 - Created web automation bots with Puppeteer and Node.js for scaling user activities.
 - Built data mining/scraping projects using Puppeteer to gather data in CSV format for corporate strategies.
-

Umbrella.qa (Remote, Qatar) — *Frontend Engineer*

2019 – 2020

- Developed highly interactive web applications for a laundry delivery dashboard.
 - Designed customer-facing and controller dashboards for managing orders.
 - Built and shipped components within corporate technology constraints using third-party UI libraries.
-

Tech Interests

- Developing AR/VR applications.
 - Enthusiast of Web 3.0.
 - Actively learning Three.js for immersive 3D applications.
 - Crypto enthusiast with a keen interest in blockchain development.
-

Passion Projects

Automation Bots

- Angellist Investor Lead Generating Bot.
- Instagram Bot for automating marketing tasks.
- JustDial.com Scraper.
- Amazon Scraper.

Progressive Web Applications

- Lightweight IMDb Clone.
- Educational Visualization: Recamán's Sequence.
- PWA for Local Task Management.
